

ACKNOWLEDGMENTS

The development of RWEQ and this manual was possible because of the dedication and patience of Cathy Lester, Charles Yates, Adela Ramirez, Brandi Calvio, Melanie Flenniken and Rhea Fryar. As project leader I want to say thanks for a job well done.

The following scientists and conservationists represent the CORE group responsible for RWEQ.

ARS SCIENTISTS

D.W. Fryrear - Project Leader	E. Skidmore
A. Saleh - Programmer	J. Steiner
J.D. Bilbro	J. Stout
M. Lindstrom	P. Unger
S. Merrill	K. Potter
H. Schomberg	T. Zobeck

REVIEWERS

D. Armbrust	K. Saxton
A. Durar	J. Tatarko
L. Hagen	L. Wagner

NPS

C.R. Amerman
S. Rawlins
D. Kemper

NRCS

S. Argabright	K. Schertz
H. Bogusch	R. Sinclair
M. Dollar	L. Sutherland
R. Grossman	G. Tibke
K. Pfeiffer	

Many additional scientists have reviewed, tested, and patiently supported the completion of RWEQ. Their comments and suggestions have been appreciated. It is difficult to assimilate new technology into a coherent efficient program without mistakes or omissions; I take responsibility for and apologize for any errors that remain. RWEQ is not intended to answer *all* needs for wind erosion information. It does represent a major advance over WEQ in wind erosion mechanics.
